

↑ HECTOR screw

Large versatile pear-shaped HMS carabiner with screw lock gate designed for multiple uses mainly for belaying or anchoring when working at heights. Due to high strength and large gate opening it is mainly used as a central carabiner when anchoring.

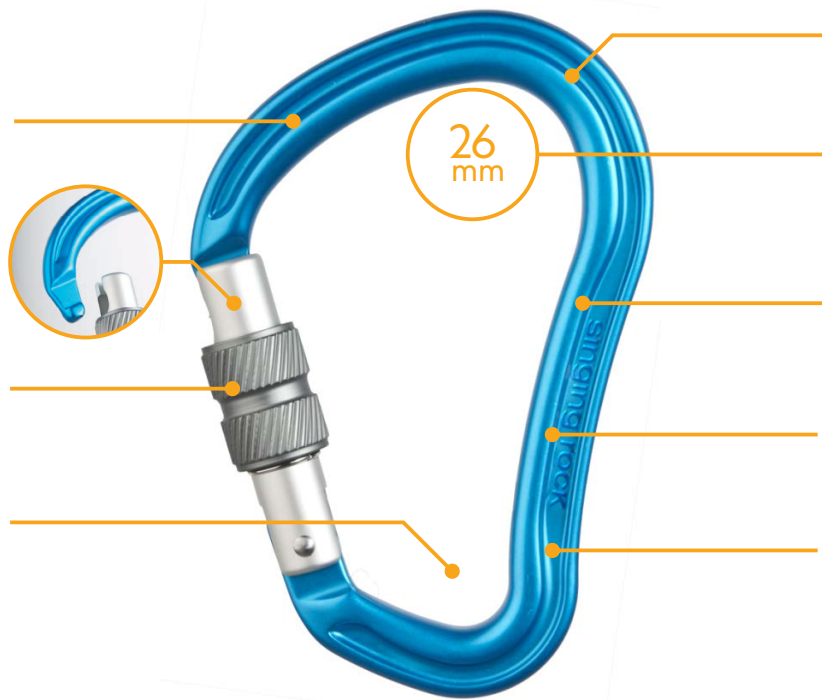

DESCRIPTION

Pear-shaped basket facilitates belaying with the MÜNTER hitch or other belay devices.

Angled snag free Keylock nose for smooth clipping and unclipping maneuvers.

Rough notches on the locking sleeve for easy manipulation even with gloves.

Each carabiner is individually tested for a strength of 10 kN.

Large rope bearing area for better rope glide and reduced wear on the carabiner.

Gate opening and basket area are large enough to easily accommodate a big anchor point or more slings.

Hot-forged I-beam construction makes the carabiner extremely strong, stiff and light.

Excellent ergonomics provides perfect handling with the carabiner.

The anodised surface improves the corrosion resistance of the carabiner. It is available in two colours.

KEY FEATURES

- large opening (26 mm)
- excellent ergonomics
- high strength (30 kN)

STANDARDS

CE 1019
