

SETO LED SNAKE 25/300 - SAFE WAY

The SETO LED SNAKE SAFE WAY series minimises the effort for temporary construction path lighting. Long corridors or staircases and lift shafts can be illuminated with the LED rope lights within a very short time.

For this purpose, the flexible and highly robust LED rope light is simply rolled out and attached to the ceiling of a corridor with clips or reversible adhesive tape, or suspended in the stairwell. Depending on the size of the area to be illuminated, several ropes can also be combined so that the required illumination is always achieved.

Thanks to the high power of 12 watts per metre, distributed over 180 LEDs per metre, the LED rope lights of the SETO LED SNAKE SAFE WAY series achieve a previously unattained luminous intensity.

With the help of a special fluorescent additive in the sheath of the SETO LED SNAKE SAFE WAY, it glows even after the power is switched off. This means that it is still visible for some time even in the dark and provides orientation in an emergency.

TECHNICAL DATA

Lighting Data

Colour Temperature	5.000 K
CRI	>80

Electrical Data

Input Voltage	230 V
Mains Frequency	50/60 Hz
Type of Current	AC
Power Consumption	300 W
Protection Class	II

General Data

Model	25/300 - SAFE WAY
Temperature (max)	45 °C
Dimensions	15x8 mm
Weight	4,79 kg
IP Class	IP65 (Connector: IP44)
Temperature (min)	-20 °C
Brand	SETO
Series	LED Snake
